ONLINE EXECUTIVE MASTER OF HEALTH ADMINISTRATION
at the George Washington University

PROGRAM OVERVIEW
MHA@GW is the online Executive Master of Health Administration (MHA) program from the renowned Milken Institute School of Public Health at the George Washington University. Designed for working professionals with at least three years of experience in the health care or health services industry, MHA@GW offers students the opportunity to form connections with other health care professionals in seminar-style, online classes. Students' professions range from acute care and clinical practitioners to positions in technical, legal or pharmaceutical fields.

THE MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH
Located in Washington, D.C. — the nation's hub for health policy — the Milken Institute School of Public Health at the George Washington University is ranked No. 14 on U.S. News & World Report’s list of best graduate schools in public health. GW faculty members are well-connected experts in the field who actively conduct cutting-edge research and engage in one-on-one mentorships with students.

WHY EARN AN EXECUTIVE MHA?
The health care industry is growing at the fastest rate the field has seen since 1991.¹ Due to an aging baby boomer population and a rise in spending, it is projected that the health care industry will become the nation's largest job sector over the next three years.² Given this growth, now is an excellent time to advance your career within the thriving field.

MHA@GW CURRICULUM
This program is designed specifically for aspiring leaders of health care organizations. The curriculum builds expertise in a range of critical skill sets necessary for optimal delivery of health care, including:

- Management and strategy
- Finance and economics
- Quality improvement
- Information technology and decision science
- Community health and quantitative methods
- Law and regulation

These targeted areas of study are addressed through a series of 10-week online modules. During their time in the program, students will also meet in person to attend four real-world immersive learning events, which focus on leadership, ethics, health system analysis and research. These immersions are hosted at the GW campus in Washington, D.C. and at health organizations across the U.S. and around the world.

CAREER ADVANCEMENT
Earning your MHA can position you to assume leadership roles in a range of health-related fields. Graduates have taken on positions as varied as health policy advisor, hospital chief operating officer and president of a health-care-focused IT firm.

LIVE CLASSES
Participate in live, interactive online classes delivered face-to-face by GW faculty, featuring a small student-to-teacher ratio.

SELF-PACED COURSEWORK
Access high-quality, faculty-designed multimedia coursework — available online 24/7.

SOCIAL ENGAGEMENT
Collaborate in a virtual boardroom setting with other health care professionals who have broad experience in the field and can offer diverse perspectives to help solve current workplace challenges.

IMMERSIONS
Benefit from real-world learning during four in-person immersion experiences held on the GW campus and at health care facilities in the U.S. and abroad. Past immersion locations have included Amsterdam, Miami, London and San Diego.

SUPPORT
Receive dedicated support from GW’s network of faculty, academic advisors, career services advisors and global community of well-connected alumni.

“Our MHA@GW students join a network of experienced health care professionals who turn to one another for professional support throughout their careers. As a community, we continually learn from each other. Every student offers fresh insight into organizational issues and a unique perspective on health care reform.”
